

Letter from United Way

Dear 2011 Campaign Coordinators;

It is our honor to work with you and other dedicated campaign coordinators across Craven, Carteret, Jones and Pamlico Counties to support the United Way's effort to help people here in our community that are in need.

Working together with the United Way in this campaign, we can help to ensure that children are achieving their goals and are ready to earn when they leave school, we can help low-income working families achieve financial stability and independence and finally through our hard work we can help improve the health and stability of seniors and others in need of medical care in our community.

It's **our** time, now, to help lead the charge for the United Way so we can make these goals a reality and improve the community where we all work and live.

We want to thank you in advance for all you do to serve those in need in our communities. Please be assured that you really do make a difference and your work in leading your employee-giving campaigns is greatly appreciated and respected in our community. We wish you the best of luck and success in your individual campaign efforts as we **Give, Advocate and Volunteer to Live United.**

Sincerely,

Sandra
